

## **STURTEVANT TECHNOLOGIES:**

### **SIZE REDUCTION**

#### **■ Coarse reductions to 50 mesh**

- Jaw Crusher-tough abrasive material
- Roll Crusher-minimal fines generation
- Hammermill-general purpose reductions

#### **■ 50 mesh–325 mesh**

- Simpactor<sup>®</sup>-impact mill—minimally abrasive powders and slurries

#### **■ 200 mesh–5 micron**

- Powderizer<sup>®</sup>-classifying impact mill—mildly abrasive products

#### **■ 45 micron to sub micron**

- Micronizer<sup>®</sup>-jet mill—soft to highly abrasive materials

### **AIR CLASSIFICATION**

Separating dry powders into coarse and fine fractions

#### **■ 100 mesh–325 mesh**

- Whirlwind<sup>®</sup> Air Classifier

#### **■ 100 mesh–400 mesh**

- SD<sup>®</sup> High Efficiency Air Classifier

#### **■ 400 mesh–3 micron**

- Superfine Air Classifier

348 Circuit St., Hanover, MA 02339-2129
